54 Theme park attraction for multiple participants using real time simulation.

(27) A real time interactive simulator system that involves a plurality of participants that cooperate to interactively achieve a predetermined objective. The system comprises a parallel computer processor and a plurality of video simulators coupled to the parallel processor. Each video simulator comprises an interactive video simulation that is displayed and incorporates selection devices such as joysticks and selection buttons that permit a plurality of participants to individually and cooperatively interact with the video simulation to achieve a predetermined objective. Each of the plurality of participants independently affects the achievement of the objective and the cooperation between participants is determinative of the achievement of the objective.
